

HOGUE "AUTOMATIC" GRIP FEATURES INCLUDE:

- Fancy grade hardwoods that dress up any firearm. Covering a major portion of the handgun, the grip affects its appearance tremendously.
- Each automatic style grip is made with the quality and exacting fit that Hogue is famous for.

We at Hogue Grips know the beauty and comfort of a handgun is very important to the shooter. Hogue "Automatic" grips are an excellent choice for factory replacement stocks.

A Fancy wood grip will turn any ordinary gun into a unique custom firearm.

-- SAFETY --

Before working on your firearm, remove the magazine and make sure the FIREARM IS UNLOADED.

CARE AND MAINTENANCE

With proper care your new Hogue grip will provide you with many years of service. Although the hardwoods used are some of the hardest available (much harder than common walnut) they are still subject to the elements. **Avoid prolonged contact with moisture or oils.**

It is recommended that you remove your hardwood grips before cleaning your gun. The finish used on your grip is a natural buffed carnauba wax (checkering has a clear lacquer finish.)

Care for your grip like any piece of hand rubbed furniture. With handling, your grip will take on a satin finish that can be maintained by buffing with a soft cloth. Or, like most, simply buff them a few times on your jeans. You may also use a furniture polish if you wish.

All of us at Hogue wish you many years of happy shooting with your new grip.

IMPORTANT!

Check all functions of your firearm after grips are installed. Testfire your firearm. This is especially important if weapon is to be used for law enforcement duty.

A FEW WORDS ABOUT FIT

It is a fact that firearm frame dimensions vary from firearm to firearm. Every Hogue grip is hand-fitted to an actual firearm before it is shipped. No grip is released unless it fits our firearms properly. Please keep this in mind. Because of frame variations, an occasional misfit may be encountered. Don't be alarmed! If your grip does not fit your firearm's frame to your satisfaction, we will do whatever it takes to fit your grip, or exchange it for one that will.

Most of the time a simple phone call will remedy the situation. Before you call, be sure you have read the instructions and installed the grip properly.

It is imperative to make sure that every firearm functions properly with after-market grips installed. This is especially important on any firearm where the grip comes in close proximity to working components such as the mainspring, trigger bar, etc. Although the grip functions properly on our firearms, it is the user's responsibility to assure that the grip functions properly on the firearm being fitted. If you do not feel competent to check the proper function yourself, we suggest visiting your gunsmith to check this for you. It is important to testfire a pistol fitted with new grips before using it in the field.

If you have any problems installing your Hogue grip, please call us at 1-800-438-4747. We will be glad to help make sure your grip fits perfectly.
