

PORTABLE LIGHTING TOOLS

FOR THE CONSUMER

THE KEY TO EFFECTIVE EMERGENCY PLANNING

NANO LIGHT®

This truly tiny, personal flashlight is ideal for carrying on your key ring or storing in your pocket, glove compartment, purse, backpack, or tool bag. At less than 2 inches long you can conveniently carry it with you at all times.

- Non-rotating snap hook attaches to key rings, zippers, backpacks, clothing, etc.
- White LED delivers 10 lumens; runs 8 hours
- Anodized aluminum construction
- Includes 4 alkaline button cells (included)
- 1.47"; .36 oz.

AT HOME:

Keep it in your bedside table for easy access. It provides a bright beam so you can check on your family when the power goes out. At less than \$12, everyone in the family can have one without breaking the bank.

IN YOUR CAR:

Since it attaches to your key ring, you can rest assured that you will always have it with you. Use it to search your glove compartment or read a map.

AT WORK:

Store it in your desk drawer for easy access, or keep it on your key ring or coat zipper, so you can grab on the way out should you need to evacuate the building.

- #73006 Nano Light - Orange
- #73007 Nano Light - Coyote

With the summer storm season upon us, it's wise to plan for emergencies resulting in a major power loss due to extreme heat, hurricanes, tornadoes, or lightning strikes. Under severe weather conditions like these, having a "disaster supply kit" is essential. The Center for Disease Control's (CDC) website has a list of recommended items to help you prepare an emergency preparedness kit, including a flashlight. Streamlight's The Siege®, Waypoint®, and PolyTac® LED are ideal lighting tools to have on-hand in your home, your car, as well as at the office.

AT HOME:

The **THE SIEGE** provides the security of bright light for your family with 360° of illumination. It's cost-efficient with a 12-day run time on low and uses affordable, easy-to-find alkaline batteries. It's lightweight and portable so you can carry it with you to your family's planned escape route, to check on your property, or to check on your neighbors.

The **WAYPOINT**, available in both alkaline and rechargeable models, features a far-reaching beam so you can check the attic or basement before going all the way in. An integrated stand lets you set it down for hands-free use. Multiple modes let you choose between bright light and longer run times.

The **POLYTAC LED** uses two 3V lithium batteries with a 10-year shelf life so you can rest assured that you'll have a light when you need it. They're compact so you can store them within easy reach in your night stand. They're affordable, so everyone in the family can have one.

IN YOUR CAR:

If you're stranded in your car, **THE SIEGE** is a handy tool to have in your preparedness kit along with your jumper cables. It's rugged, compact (it won't take up a lot of room in your trunk), and it features an SOS function (with red light) to signal for help.

The **WAYPOINT** features an integrated stand so you can set it down and still have light to change your tire or check the radiator. Multiple lighting modes give you the option of a bright, far-reaching beam or longer run times to conserve battery life. Emergency signal function alerts others to your location.

POLYTAC LED is compact so it won't take up a lot of space in your glove box. Two 3V lithium batteries can withstand temperature extremes so you can be confident that the light will shine after a cold winter. It's also waterproof so if you need to change a tire in the rain, your flashlight will be the least of your worries.

AT WORK:

The **THE SIEGE** lantern is convenient when it becomes necessary to move about a facility to power down or disconnect critical equipment, retrieve sensitive documents, or guide employees through remote areas lacking adequate backup lighting.

The **WAYPOINT** produces a long-range beam that reaches into hard to access areas such as the warehouse ceiling that you're checking for leaks or a damaged light. It also features a weight-balanced design that won't tire you out while making your inspections.

POLYTAC LED is compact so you can store it in your desk drawer. It uses two 3V lithium batteries with a 10-year shelf life so you can rest assured that you'll have a light if you need to evacuate the building.

Visit the CDC's website at www.emergency.cdc.gov/preparedness/kit/disasters for more information on putting together your kit.

When the light goes out, you can depend on Streamlight to light the way in darkened conditions. Streamlight also offers headlamps for hands-free use. Visit www.streamlight.com for our full offering of headlamps, non-rechargeable and rechargeable products.

STREAMLIGHT®

THE SIEGE® Rugged, cordless, alkaline battery-powered lantern provides 360° of soft, even light that illuminates a large area.

- White C4 LED (four LEDs) with high, medium and low modes
 - High for brightest light; 340 lumens; runs 30 hours
 - Medium for bright light and longer run times; 175 lumens; runs 3 days
 - Low provides extended run times for when less light is needed; 33 lumens; runs 12 days
- Red LED with two modes, both at 10 lumens
 - Red LED High - Steady (night vision preserving mode) runs 9.75 days
 - Flash SOS mode for emergency signaling; 10 lumens; runs 18 days
- Uses three "D" cell alkaline batteries (sold separately)
- Durable, polymer construction with rubber molded base that provides stability on slippery or uneven surfaces
- Hang in either inverted or upright positions with D-rings (on top and bottom of light)
- Ergonomic handle makes it comfortable to carry; incorporated hook allows for hanging
- IPX7 waterproof to 1m submersion; IT FLOATS!
- 2 meter impact resistance tested

#44931 The Siege - Coyote

WAYPOINT® Available in alkaline and rechargeable models. Perfect for illuminating objects across long distances.

- Pistol-grip spotlight features a trigger-style switch for easy momentary and constant on operation; a secondary rotary switch selects high, low and emergency signal functions
- Deep-dish parabolic reflector produces a long-range beam with optimum peripheral illumination
- High impact polycarbonate housing; features an integrated stand for hands-free lighting; includes an adjustable lanyard

	Alkaline model output:	Rechargeable model output:
High	115,000 candela; 210 lumens; runs 8.5 hours 678m beam distance	80,000 candela; 300 lumens; runs 5 hours 560m beam distance
Low	10,000 candela; 20 lumens; runs 120 hours 245m beam distance	6,100 candela; 25 lumens; runs 50 hours 155m beam distance
Emergency Signal	Runs 120 hours	Runs 35 hours

- Alkaline model:
 - Includes a 12V DC power cord that provides unlimited run time
 - Powered by 4 "C" batteries (not included) or 12V DC power cord
 - IPX4 water-resistant
- Rechargeable model:
 - Powered by rechargeable lithium ion battery; fully recharges in 4 hours
 - IPX8 waterproof to 2 meters; it floats

Alkaline Model

- #44900 Waypoint - Box - Yellow
- #44902 Waypoint - Box - Black
- #44904 Waypoint - Clam - Yellow
- #44905 Waypoint - Clam - Black

Rechargeable Model

- #44910 Waypoint 120V AC - Box - Yellow
- #44911 Waypoint 120V AC - Box - Black

POLYTAC® LED Virtually indestructible nylon polymer LED tactical light.

- C4® LED delivers 5,200 candela peak beam intensity; 130 lumens; runs 3 hours
- Features Solid State power regulation that provides maximum light output throughout battery life
- Push button tail switch facilitates one-handed operation
- High impact super tough nylon polymer construction for exceptional durability and a sure grip
- IPX7 waterproof to 1 meter for 30 minutes
- Powered by two 3V CRI123A lithium batteries (included) with 10-year shelf life
- 5.22"; Lightweight, just 4.1 oz.
- Available in Black, Coyote and Yellow

- #88853 PolyTac LED - Yellow
- #88850 PolyTac LED - Black
