

MODEL TSK327 TASK HEAVY SOGL GLOVES

FLASH AND SLASH PROTECTION

TSK327 TASK HEAVY SOGL

Engineered for SWAT and military applications, the Task Heavy SOGL is constructed of goatskin leather and heavy-duty Nomex[®] fabric to provide flash and slash protection. An all-leather Z-pattern reinforces and safeguards the palm. For maximum dexterity and shock-absorption, a hinged EVA foam knuckle articulates with hand movements, without pulling on the fingertips.

The durable SOGL model glove has the same design as the TSK329, but with a softer, less aggressive, leather knuckle padding. The Task Heavy SOGL incorporates the five innovative features of the Task Specific line including the Ergo-Cut[™] Floating Thumb pattern, Cut-Ring index finger, articulated strap, all-soft flexible cuff, and knuckle touchscreen technology.

PATENTED

FEATURES

- Heavy-duty Nomex[®] and abrasion-resistant goatskin leather construction
- Hinged EVA foam knuckle for shock absorption and maximum dexterity
- Patented Z-pattern palm reinforcement with EVA foam for shock absorption
- All-soft cuff, to flex around a wristwatch, provides comfort and freedom of movement
- Patented index finger Cut-Ring to ensure no unraveling when glove tip is cut off
- Ergo-Cut Floating Thumb pattern for a comfortable fit, offering greater dexterity
- Articulated strap accommodates a larger watch, offers personalized adjustability
